## 🎓 EDUCATION

### Software Engineering

Firat University

2019 – 2023 | Elazig, Turkey

## 🌐 LANGUAGES

English ●●●●●

Turkish ●●●●●

## 🧠 SKILLS

- Software Engineering Knowledge
- Machine Learning
- Deep Learning
- C# Asp Net Core
- JavaScript - Angular
- SQL
- Swift UI
- Swift UIKit

## 🔗 REFERENCES

Taner Saydam, Senior Software Developer

## 👤 PROFILE

I am a solution-oriented Software Developer who excels at solving technical and complex coding problems. I am also known for developing innovative, creative and successful applications. I am a confident and proactive software engineer. Technologies I am skilled in: C# ASP.NET, MSSQL, PostgreSQL, Swift and Python.

## 📁 PROFESSIONAL EXPERIENCE

### iOS Developer

Sugar Technology

09/2022 – 01/2023 | İstanbul

- I worked as an ios developer intern for 70 working days. I developed a project on augmented reality with SwiftUI.

### Backend Developer

ETİYA

07/2022 – 08/2022 | Ankara

- I worked as a backend developer intern for 20 working days. We developed an order management project with Java Spring Boot technology.

## 📁 PROJECTS

### E commerce 🔗

I developed an E-commerce website with C# Asp.Net. On the frontend, I used Html, Css, JavaScript, JQuery technologies. I developed the backend side with Asp Net.

### Stock Tracking App 🔗

As my graduation project, I developed a stock tracking application using Swift programming language and Xcode. I used MVC design pattern and firebase.

### Audio Signal Classification DeepLearning 🔗

For our Artificial Intelligence course, I developed an artificial intelligence application that predicts the class of the audio file using a Convolutional Neural Networks (CNN) model. I used Tensorflow, Keras, Sklearn, Pandas, Matplotlib, Numpy libraries.

### Podcast 🔗

I developed my podcast project with MVVM design pattern and programmatic UI.

### Task Manager 🔗

I worked on the backend side of the Windows task manager project, which we developed with a team of 6 people within the scope of the Operating Systems course. We developed this project with C# winform. For the UI part, we preferred a ready-made template.

## 📖 COURSES

### İnspimo

03/2024 – present

FullStack .Net Core Developer Bootcamp
